Design Overview

Architectural design

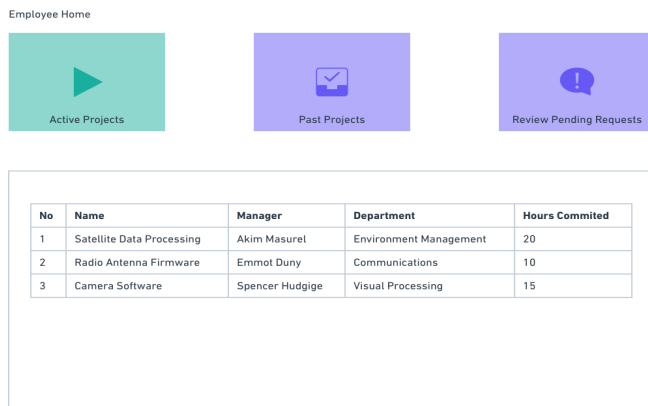

System interfaces

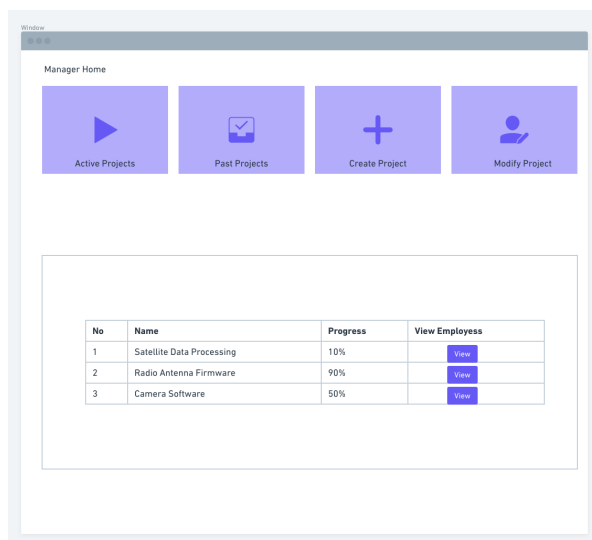

User Interface

Wireframes are attached below:

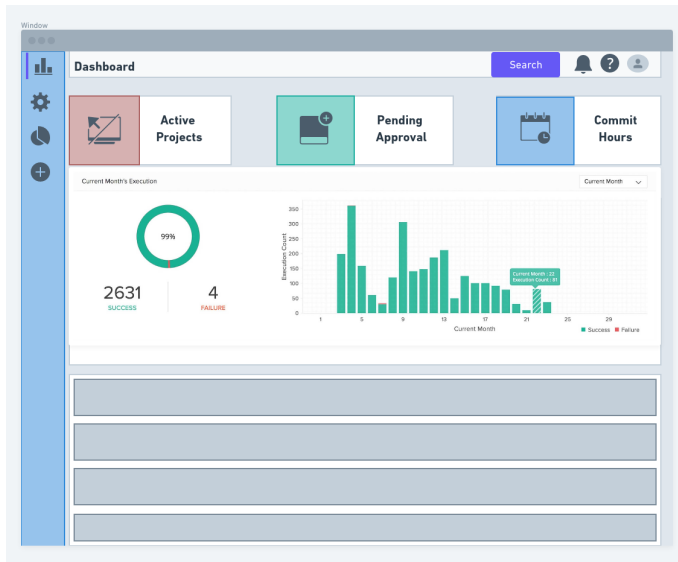

1) Employee Home Page

2) Manager Home Page

3) HOD Home Page

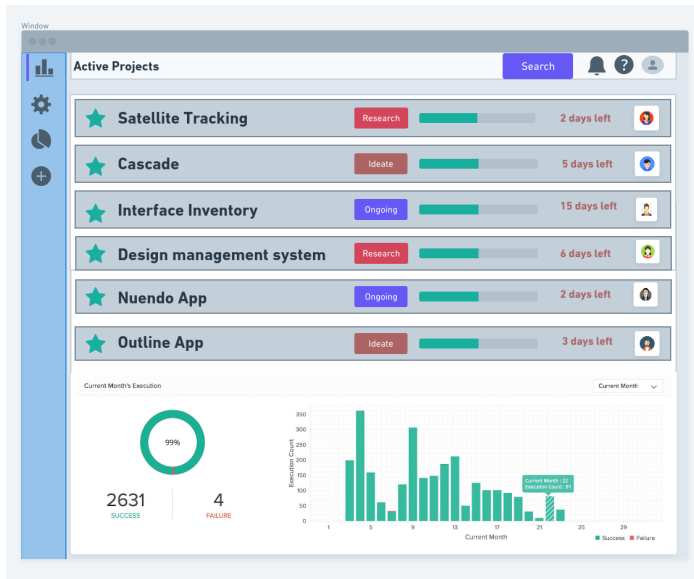

4) Employee Review Requests

The screenshot displays the Employee Review Requests table. It shows a list of pending approvals with 'Confirm' and 'Reject' buttons for each item.

Item	Action
Molotow Website	Confirm Reject
Reason App	Confirm Reject
Molotow Website	Confirm Reject
Molotow Website	Confirm Reject
Molotow Website	Confirm Reject
Molotow Website	Confirm Reject
Molotow Website	Confirm Reject
Molotow Website	Confirm Reject
Molotow Website	Confirm Reject
Molotow Website	Confirm Reject

5) HOD Review Projects

APIs

User class

- view_account_info()
- edit_account_info()
- register()
- login()

Manager class

- create_project()
- modify_project()
- confirm_hours()

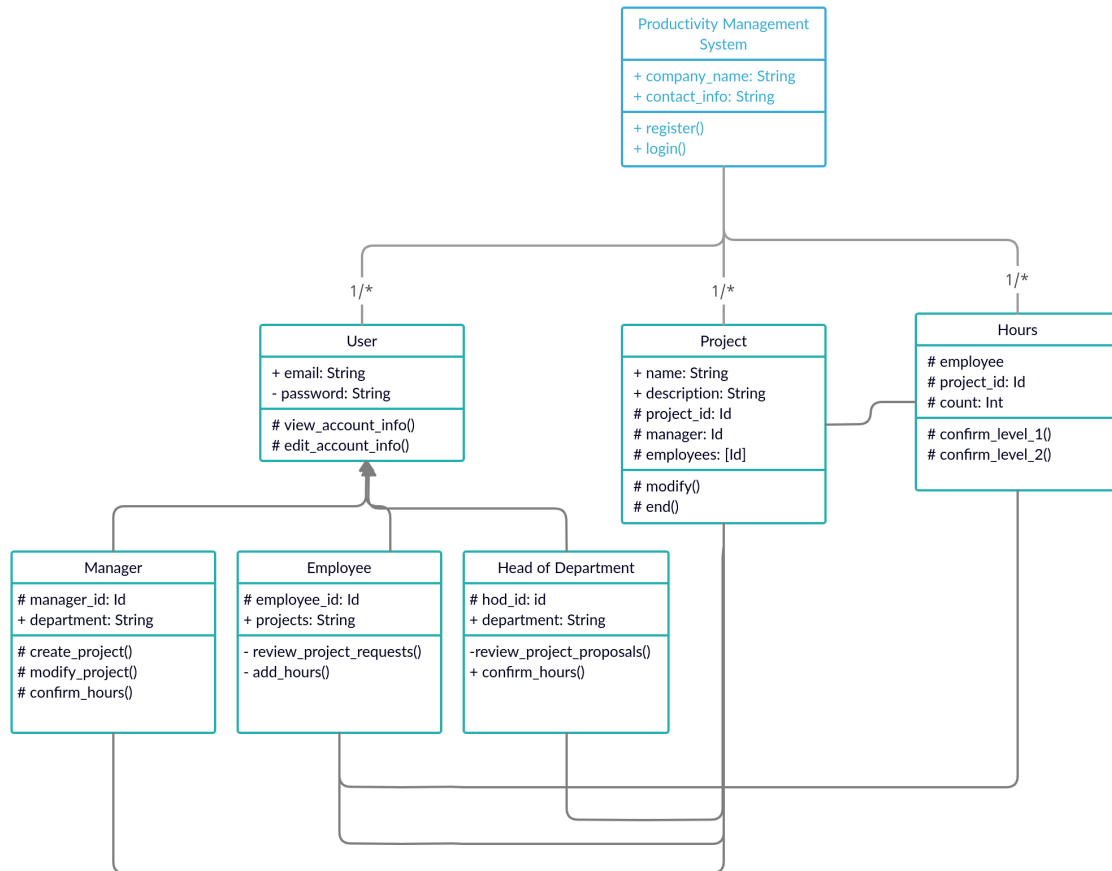

Employee class

- review_project_request()
- add_hours()

HOD class

- review_project_proposals()
- confirm_hours()

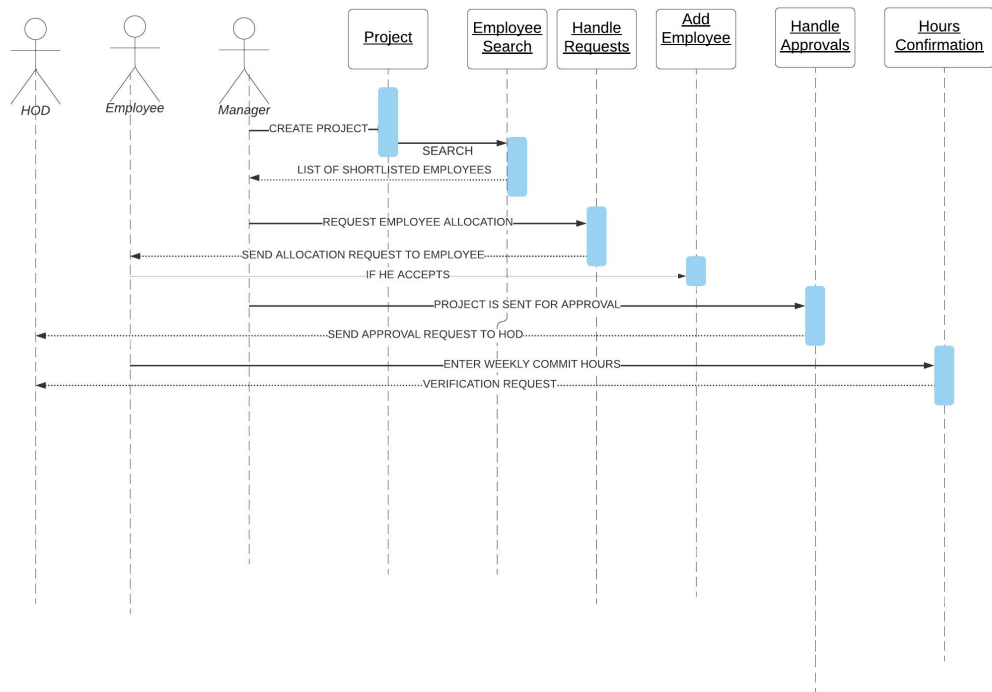

Model

Productivity Management Tool	<ul style="list-style-type: none"> Class State: Company Name and Information Class Behavior Registration or Login
User	<ul style="list-style-type: none"> Class State: Has email and password for login. Class Behavior Account information of each can be viewed or edited.
Project	<ul style="list-style-type: none"> Class State: Project is the work assigned or created by an employee/manager, respectively. contains information like project_name, project_id, created_by: manager, assigned to employees_id. Class Behavior: Modify() -> Make changes to the project details end() -> executed when the project is completed

Hours	<ul style="list-style-type: none"> • Class State: No. of hours an employee has given every week to a particular project. Contains info like employee_id, project_id, no. of hours • Class Behavior Confirm_level_1():Confirmation from manager Confirm_level_1():Confirmation from HOD
Head of Dept.	<ul style="list-style-type: none"> • Class State: Each dept. has a HOD which accepts project proposals and confirms the no. of hours devoted by employees Has info like Name of Dept. Headed, hod_id • Class Behavior review_proposal(), confirm_hours()
Manager	<ul style="list-style-type: none"> • Class State: The manager is the middle man between employee and HOD. Creates projects and request employee team that should work on them. Has info like manager_id and department. • Class Behavior create_project(): manager can create a project modify_project():manager can modify a project confirm_hours(): manager can confirm no. of hours an employee has given

Sequence Diagram(s)

Design Rationale

All users are technical, So a basic UI is sufficient.
